

Trousers COMFORTPRO 4-Way stretch GRAPHENE (black)

BoSafety COMFORTPRO trousers - a UNISEX product designed not only for work but also for leisure!

FABRIC:

The trousers are made of “**4-Way Stretch GRAPHENE**” fabric. This graphene-infused material is exceptionally elastic, allowing for maximum freedom of movement while also being highly resistant to abrasion. The thermoregulating properties of graphene make these trousers comfortable to wear in different temperatures.

FUNCTIONALITY:

- The waistband is made of strong and elastic rubber, ensuring a perfect fit for different body types.
- Deep and spacious pockets in the hip and thigh areas are ideal for carrying work tools or leisure essentials.
- A modern look and stylish design are enhanced by the elastic band at the bottom of the trousers.
- Suitable for light work and active leisure.
