

## **PRODUCT DETAILS:**

### **Product code:**

AS-MULTISAFE-JK-C2-0405

### **Fabric:**

75% Cotton/ 24% Polyester/ 1% Antistatic yarn 300g/m<sup>2</sup>

## **FABRIC PROPERTIES:**

- Comfort and breathability – thanks to its high cotton content, the fabric is soft and highly breathable.
- Resistance and durability – polyester makes the fabric more resistant to abrasion and tearing.
- Antistatic properties – thanks to the antistatic thread, the fabric does not become electrically charged and is safer to use in specific working environments.
- Medium-weight fabric – 300 g/m<sup>2</sup> weight provides a good balance between strength and comfort, suitable for working in a variety of conditions.
- Easy care – the fabric creases less, is easy to wash, and dries quickly.

## **DETAILS:**

- Designed to meet Class 2 safety requirements for workers. Jacket details with high-visibility fabric and light-reflective reflective strips.
- 2 patch pockets – on the chest. The left pocket is fastened with a zipper covered by flaps, 2 pockets on the waist – fastened with flaps. The flaps are securely fastened with Velcro strips.
- The jacket fastens with a zipper that can be opened from both the top and bottom and is covered with a flap. The flap fastens with press studs.
- The cuff fits comfortably around the arm thanks to the wide elastic band sewn into it.
- Extended back section.

- The width of the bottom of the jacket is adjustable with fasteners.

**IDEAL FOR:**

- Operates at higher temperatures, making it suitable for use in hazardous work environments, such as welding or metalworking industries.
- In the electrical and electronics industry.
- Construction and technical works.
